

Design Tool 2.2: What Goes On in a STEM Class?

Directions for students: You just read a true story about a STEM class. Now think like a detective – think carefully about story. List the things these students did and were learning during their STEM class. Then try to figure out what types of things happen in STEM classes.

What Goes On in a STEM Class?

What students were doing	What they were learning

What types of things do you think happen in STEM projects?
